COLOR MATCHING FOR CAN PRINTING

The industry's first true color standard for beverage can design printed directly on metal allows brand owners, designers, and metal decorators to select, communicate, and approve color efficiently, reducing lead times—getting labels to market quicker. Includes 600+ removable metal color swatches plus a digital library of the same INX colors for Adobe® and other design programs.

DEPALLETIZING FOR SMALLER SPACES
 The Nimbus is a half-height depalletizer optimized for small spaces and lower-speed applications. Its discharge height allows for excellent can drop and many discharge angle options. This machine combines a foldable version of our patented rotary discharge with our pallet lift and layer sweep design—a brand new, low-cost innovation in packaging technology.

THE LOGICAL SOLUTION
 Brewmation's Cellar Logic technology lets you monitor and control your fermentations from your taproom...or your living room. Receive an email alert if temperatures are outside of the set limits, set and adjust fermentation profiles, and log every data point for a clear record of each fermentation.

ABS Commercial is giving back to the craft-beer community! We are giving away an ABS Keg Viking to one lucky brewery and will announce the winner live on our Facebook page on June 4. To enter, visit abs-commercial.com

AFFORDABLE QUALITY SMALL-SCALE CANNING

Start canning beer-to-go with American Canning Machines' single-head, countertop filler/seamer. This single-operator machine fills directly from a keg or brite tank, running any standard diameter can at 6-12 CPM. Close proximity to the source means shorter hose lines and colder canning temperatures. Optional infeed/accumulation table provides 22-can queue to avoid pauses in fills. Features include underlid gassing, pre-purge, rotary lid application, easy can-height adjustment, and long-life high precision tooling. Distributed by American Canning.

HARD-SELTZER BASE AND NONALCOHOLIC BEER FROM A SINGLE MACHINE

The Alchemator from ProBrew utilizes proprietary membrane technology that separates the alcohol and water from beer to create two new beverage offerings! Easily craft a unique low-alcohol or nonalcoholic craft beer without compromising flavor, color, or hazy turbidity, while the alcohol and water easily craft a crystal-clear hard seltzer exclusive to your brewery!
